About Us

Samper Engineering Pvt. Ltd. (SEPL) operates as a major industrial & hydraulic hose and fitting supplier from Mumbai India. SEPL is aimed at servicing a wide range of markets with special interests in the oil and gas, mining and construction markets. Our manufacturing facilities and Warehouse are fully equipped to provide all types of requirements and have built many long-standing associations with large international companies around the world to bring the latest technologies to offer the best and the latest. SEPL is dedicated to providing products that combine quality at fair prices with an unmatched high level of customer service. We wish to establish partnerships with key suppliers, customers and staff that respect the interests of each party. Constantly striving to supply what the customer asks for, we will look to have good levels of local stock, and continually review what is available in the market and what can be improved.

Adhering to these basics will ensure we react to a market driven by customer demand. Success will be ultimately be measured by customers choosing us, because of their belief in our ability to meet or exceed their expectations for service, price and selection. The core prime values of the company are Care, Respect, Loyalty, Fairness and Honesty.

Our Vision

To be the global leader in industrial and hydraulic hose solutions, setting the benchmark for quality, innovation, and customer satisfaction, while fostering long-lasting partnerships and upholding values of care, respect, loyalty, fairness, and honesty.

Our Mission

Our mission is to deliver superior industrial and hydraulic hose products and fittings that meet the evolving needs of diverse industries, including oil and gas, mining, and construction.

SEPL Operate On Following Principles

Honesty

Large Stock Holding

Reliability

Flexibility

Specialist Knowledge

Competitive Pricing

PRECISION. PERFORMANCE. PARTNERSHIP

Our Quality

We endeavor for complete customer satisfaction. Hence, we ensure continual improvement of our manufacturing processes and product's quality. We also aim to furnish consistent quality in our product range and services imparted to our clients.

Tests to Ensure Superior Quality in Our Range

Visual Inspection

Pressure Test

Hardness Test

Vibration Test

Chemical Test

Why Choose SEPL?

Industry Expertise

Serving oil & gas, mining, and construction industries with precision solutions

Global Standards

Offering innovative products through trusted international partnerships

Comprehensive Inventory

Equipped with diverse stock to meet all your needs

Core Values

Driven by care, respect, loyalty, fairness, and honesty

Quality Commitment

Superior products at fair prices with unmatched customer service

Customer-Centric Approach

Focused on exceeding expectations with tailored solutions & responsive support

**Seamless Connections,
Limitless Possibilities**

SEPL Solutions to Industries

SEPL supplies high-quality hydraulic hose assemblies and complete fluid transfer solutions designed to enhance hydraulic system performance. Our reliable products help save time, reduce costs, and ensure efficient transfer of oil, gas, water, and other fluids across a wide range of industrial applications.

Pile Machinery

Pile machinery refers to machinery for drilling, creating tanks, piling, and pile-sinking in various pile foundations.

Engineering Crane Machinery

The engineering crane machinery is a general name of mechanical equipment that can lift, handle and convey materials and personnel.

Excavator Machinery

Excavators are heavy-duty machines used for digging, lifting, and material handling across construction, mining, and infrastructure projects.

Pavement & Compaction

Paving and compaction machinery ensures faster construction, lower operating costs, and improved road quality.

Shovel Transport Machinery

Shovel transport machinery delivers powerful and efficient material handling for construction, mining, & industrial applications.

Tunnel Construction Machinery

Tunnel construction machinery is used for efficient underground excavation and construction in railway, highway, metro, and other tunnel projects.

Concrete & Mortar Machinery

Concrete and mortar machinery are one of the most widely used construction equipment in the construction engineering industry.

Agricultural Machinery

Agricultural machinery provides reliable power and efficiency for farming, forestry, fisheries, and livestock operations.

Steelmaking Plant Machinery

Steelmaking machinery supports efficient metal processing and production in steel plants, ensuring reliable and high-performance operations.
